## FREQUENTLY ASKED QUESTIONS

### How do you protect our data?

SkoolITE is a cloud-hosted deployment built on the industry's best data center and network architecture. It leverages a wide variety of security features, automated monitoring and reporting services to ensure we run in a stable, secure environment.

### What happens to the information when the scholastic year is rolled-over?

All historical data is kept and none of it is deleted. Access is still guaranteed to all the relevant users.

### How does SkoolITE pricing work?

We charge a fixed subscription rate per active student with no other costs. This includes; User training, support & standard data import. Parent, student, teacher and staff accounts are free. SMS costs do apply for communication platform.

### How do I get started?

Schedule for a free demo and talk to us about your specific requirements. We offer trial version, partial and full commitment onboarding options

### What do I need to get started?

We consider some factors such as User training, Data Migration, Specific Customizations. For Data Migration, we recommend the use of **Excel Spreadsheet (Ms. Excel) for data Capture.**

### Incase of assistance, how do I go about?

We have help material which is embedded in your application as well as a knowledge base. We have a dedicated support team available just for you.
